4. Recommendations

1. Implement a regular scanning schedule (weekly for production systems).
2. Keep all systems and software up to date with the latest security patches.
3. Review and harden network configurations and firewall rules.
4. Implement network segmentation to limit lateral movement.
5. Deploy intrusion detection and prevention systems (IDS/IPS).
6. Enable logging and monitoring for all critical assets.
7. Conduct security awareness training for all personnel.
8. Establish a vulnerability management SLA (e.g. Critical: 24h, High: 7d).
